The following requirements must be complied with in the R-2 Residence District:

- a. *Height.* No building shall exceed a maximum of two and one-half (2 1/2) stories or thirty-five (35) feet in height, whichever is the lesser.
- b. *Front Yard.* There shall be a front yard of not less than seventy-five (75) feet, except that where the existing buildings on the same side of the street and within six hundred (600) feet from each side line, exclusive of streets or private roads, form an irregular setback line, new buildings may conform to the average of such irregular setback lines, provided that no new building may project closer than fifty (50) feet to the street or road property line nor need setback more than seventy-five (75) feet from the property line. A less than required setback line for an existing principal building may be extended laterally along the line, provided that the front yard toward the street property line is not further encroached upon and that the side line requirements are observed.
- c. *Side Yards.* There shall be two (2) side yards, and no side yard shall be less than thirty (30) feet. These requirements shall apply for a new building and for an alteration to an existing

building. Additions to dwellings with insufficient side yard setbacks, existing on April 21, 1997, shall be permitted if the dwelling is set back at least twenty (20) feet from the side property line and if the addition is no closer to the side property line than the existing structure.

i. *Building Envelope.* The building envelope shall exclude areas located within flood plains, wetlands and wetland buffers, except as may be approved by the New Jersey Department of Environmental Protection (NJDEP) and no floodplain nor wetlands nor wetland buffers shall be disturbed without the appropriate permits having been issued by the NJDEP.

j. *Surface Disturbance.* Disturbance of land containing slopes over fifteen (15%) percent shall be limited as per the following table, based on ten (10) foot contour intervals, as shown on a grading plan. The ten (10) foot contour intervals utilized to establish these categories should be those which result in the greatest slope, rather than simply using those contours which are multiples of ten (10).

**Maximum Surface Disturbance per Lot
Shall Not Exceed the Greater of:**

Slope Category	Percent of Category	Square Feet
15 - 24.99%	20%	1,000
25 - 29.99%	None	500
30% or greater	None	250

1. Exemptions. The following are exempt from the above slope disturbance limits:

(a) Septic system repair/alterations: Repairs to malfunctioning septic systems and alterations to septic systems (including the relocation of the field and/or tank and/or other related facilities), on lots which are not subject to a lot development plan for other reasons (such as new buildings, additions, or other significant land disturbance), and which are not for the purpose of expanding in order to accommodate additional bedrooms, subject to the following conditions, to the satisfaction of the Health Department:

(1) Septic system repairs/alterations with no expansion of use (as defined in N.J.A.C. 7:9A), such as to accommodate additional bedrooms; and

(2) The slope area to be disturbed is the minimum amount possible to complete the alteration; and

(3) The design engineer certifies on the plan that there is no practicable alternative for the placement of the system on the property that disturbs no steep slope areas; and

(4) The disturbed area shall be stabilized in accordance with the requirements of the appropriate Soil Conservation District.

(5) The design engineer shall submit photos prior to disturbance and after completion, along with a certification that the limits of disturbance and grading were completed in accordance with the approved plans meeting the above criteria.

(b) Temporary disturbance of land for the installation of underground lines (sewer laterals, water service, other utility lines) servicing existing buildings, subject to the following conditions:

(1) The trench into which the utility line is placed shall be no wider than necessary to comply with the United States Occupational Safety and Health Administration safety standards for excavations, set forth at 29 CFR Part 1926, Subpart P.; and

(2) Temporary disturbance, such as temporary construction clearing or temporary storage of dirt or equipment, shall be the minimum size necessary; and

(3) The activities shall not cause any change in preconstruction elevation of the steep slope area; and

(4) Backfill the uppermost six (6) inches of any excavation with the original topsoil material; and

(5) The disturbed area shall be replanted with indigenous plants;

(6) The disturbed area shall be stabilized in accordance with the requirements of the appropriate Soil Conservation District.
